

The Strong Ones

Sound enclosures SSK

Sound enclosures 20 kHz

The enclosures SSK-J, SSK-F and SSK-K are suitable for the quieter operation of 20 kHz-ultrasonic welding machines.

- High sound absorption
- Base unit for optimum working height optionally available
- Actuation using two-hand start, in accordance with CE standards
- Sound measuring reports of the Swiss Accident Insurance Fund (SUVA) confirm compliance with the relevant EU-directive
- Easy access through front door

Specification sound enclosure

The sound enclosures SSK-J, SSK-F and SSK-K are normally delivered completely assembled together with the relevant ultrasonic welding machine.

In order to gain an optimum working height, a height adjustable base unit is available to the sound enclosures SSK-J, SSK-F and SSK-K (100 mm)

| | |
|----------------------|---|
| Variants: | SSK-J for the ultrasonic welding machine Dynamic 3000 Series SSK-F for the ultrasonic welding machines MP202 and MP2022 SSK-K for the ultrasonic welding machine Standard 3000 Series |
| Operating frequency: | 20 kHz |
| Safety: | These sound enclosures conform to CE standards and thus correspond to the European safety requirements |
| Dimensions WxHxD: | 760 x 1700 x 800 mm |
| Weight: | 120 kg |
| Options: | Base unit |
